MEDI TRACK SYSTEM

PRODUCT INFORMATION

- Elegant and functional Medical Track System.
- Simple and quick installation.
- Bendable, both with an inside and outside bend with a 20 cm radius.
- Dustproof synthetic insert strip available.
- Bending Tool which can curve tracks easily.
- Colour: White.
- Lengths: 5.80 m (19') and 7 m (23')
- Rail quality: aluminium, chromated, powder coated.
- Factory applied patented dry lubricant.

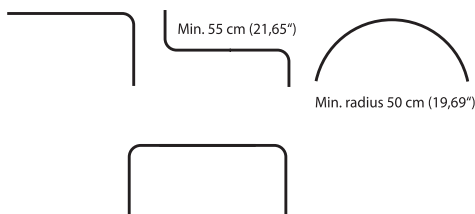

PROFILE

- Aluminium Extrusion
- Weight: 500 grams per meter (5,36 ounce per ft.)

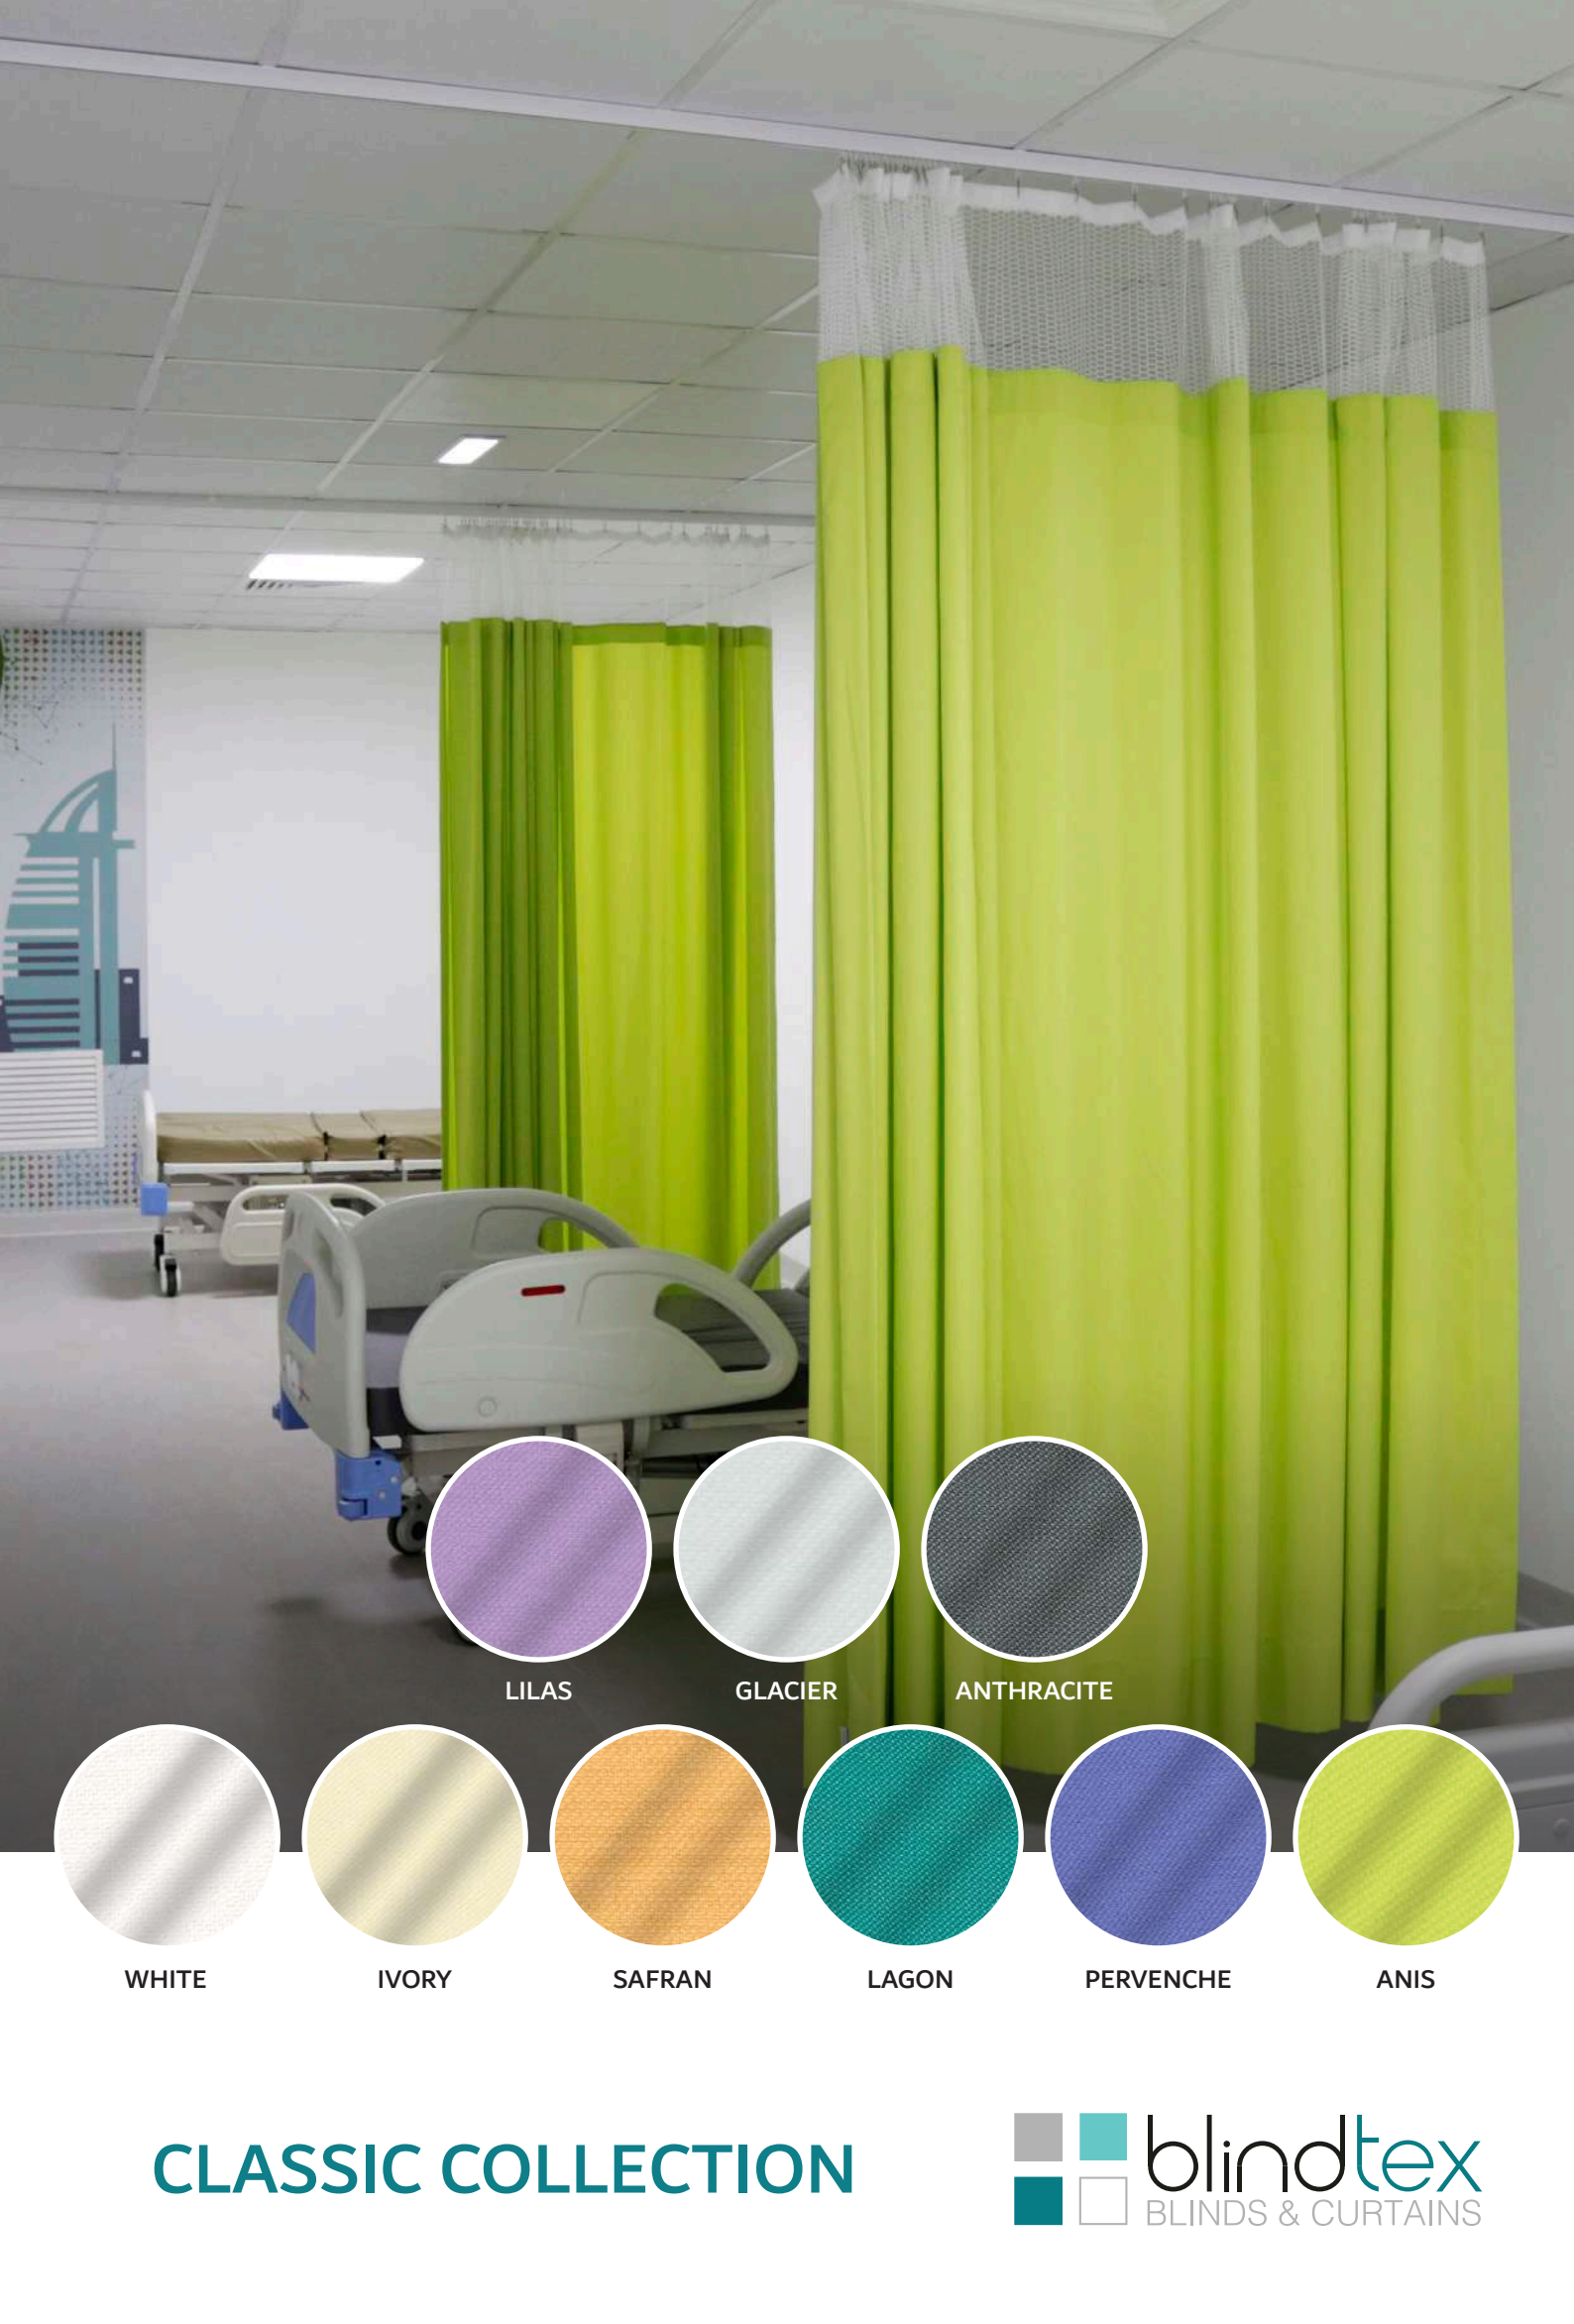

BENDING

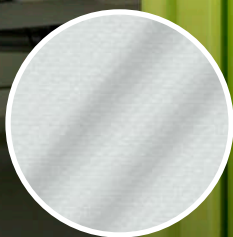

- 1 MTS Track
- 2 MTS Wall Bracket
- 3 MTS Carrier with Metal Hook
- 4 MTS Suspension Ceiling Bracket
- 5 MTS Track Bridge Long
- 6 MTS End-Cap

The Blindtex Classic Collection signifies a groundbreaking leap in sustainable textiles. This collection presents an array of fabrics and materials that are meticulously crafted using revolutionary bio-based sources, highlighting a departure from conventional petrochemical-derived textiles.

It's important to emphasize that the Classic fabric's ability to combat viruses lasts over time and remains strong even after washing or exposure to weather. This is because its antiviral power comes from the fibers it's made of, not just a surface coating. This means that, like its germ-fighting properties, the silver ions in the fabric also work against viruses, getting rid of them more quickly than on regular surfaces or untreated fabrics. Plus, Classic fabric is also flame-resistant (M1 flame retardant), making it a smart choice to effectively protect your spaces.

Antibacterial
& Fire Retardant
Lab Report

Blindtex’s Meditex fabric stands as a remarkable innovation in textile technology, offering a blend of exceptional properties that ensure safety and hygiene. This fabric boasts a dual-purpose advantage, being both fire retardant and antibacterial.

Primarily, its fire retardant nature equips it with the ability to resist and slow down the spread of flames, enhancing overall safety. Furthermore, Meditex fabric incorporates antibacterial properties, which actively inhibit the growth and proliferation of harmful microorganisms. This quality not only promotes a cleaner environment but also provides health benefits by reducing the potential for bacterial transmission.

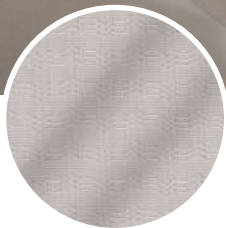

Blindtex’s Meditex fabric, therefore, offers a holistic solution for spaces that require both enhanced safety against fire incidents and a proactive approach to maintaining hygiene.

Tailored for the demanding medical environment, Blindtex presents Wardtex fabric—a specialised solution designed for cubicle curtains and bedsreads. This innovative fabric combines vital attributes crucial for healthcare settings, encompassing both fire retardant and antibacterial properties.

Wardtex’s fire retardant feature ensures an elevated level of safety, reducing the risk of fire hazards within medical spaces. Its antibacterial qualities actively impede the growth of harmful microbes, contributing to a hygienic environment crucial for patient well-being.

In addition to its functional benefits, Wardtex offers aesthetic diversity with a choice of eight distinct colors. This variety allows seamless integration into diverse design schemes, enhancing the visual appeal of medical spaces.

With its unique combination of safety, hygiene, and design versatility, Wardtex fabric stands as the optimal choice for medical settings, reflecting Blindtex’s commitment to innovation and addressing the specific needs of the healthcare industry.

Blindtex introduces Doctex fabric, a cutting-edge solution tailored exclusively for the medical sector. Purpose-built for patient well-being, it combines indispensable attributes of fire retardance and antibacterial functionality, ensuring the highest safety and hygiene standards. Doctex fabric's fire retardant feature provides essential protection against potential hazards, upholding the safety of medical environments. Its potent antibacterial properties actively thwart microbial growth, fostering a clean and sterile atmosphere crucial for patient recovery. Adding to its versatility, Doctex fabric is available in four serene and calming colors, seamlessly integrating into diverse healthcare aesthetics. The fabric's adaptability is showcased through its dual use—crafted into curtains with or without a mesh and also suitable for bedding purposes.

Incorporating innovation and utility, Doctex fabric by Blindtex stands as an exceptional choice, exemplifying the brand's commitment to addressing the unique requirements of the medical field while ensuring comfort, safety, and style.

INTEGRAL MESH

Blindtex proudly presents the Printex collection—a remarkable ensemble designed to elevate healthcare environments. This collection features seven captivating double-sided prints, each a testament to innovation and style. Printex’s versatility is showcased through two designs graced with soothing pastel shades, imparting a serene ambiance that aids in patient well-being. For pediatric settings, a charming sealife design is offered, fostering a calming atmosphere conducive to children’s comfort.

Crucially, all fabrics within the Printex collection possess fire retardant and antibacterial properties, demonstrating Blindtex’s commitment to healthcare safety and hygiene. These attributes are tailored to meet the stringent demands of the healthcare industry, ensuring both patient security and a sterile environment.

With the Printex collection, Blindtex merges aesthetics, function, and well-being, creating a textile solution that redefines healthcare spaces. This collection stands as a beacon of comfort and innovation, underlining Blindtex’s dedication to enhancing healthcare surroundings with thoughtfully designed fabrics.

Antibacterial
Lab Report

Disposable medical cubicle curtains are an indispensable component of healthcare facilities, ensuring patient privacy and infection control.

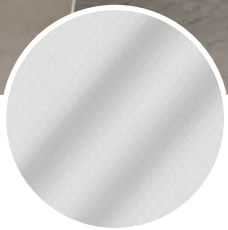

One of the standout features of Blindtex's curtains is their fire-retardant properties, tested to UK standards BS 5867-2:2008 type C, a crucial element in healthcare settings where safety is paramount.

Blindtex's curtains are designed to combat bacterial growth, reducing the potential for healthcare-associated infections (HAIs), with internationally recognised test standards ISO 20743.

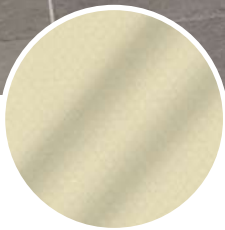

Wherever bacteria, mould, mildew and fungi compromise product performance, Ultra-Fresh® will take control. Ultra-Fresh antimicrobial treatments inhibit the growth of bacteria and fungi responsible for creating unpleasant smells and staining in textile and plastic products. By controlling unwanted microbes, Ultra-Fresh antimicrobials help to keep products fresh, clean and odor-free.

Furthermore, Blindtex offers these curtains in a variety of eight colors, allowing healthcare facilities to maintain a pleasant and comforting atmosphere while adhering to their specific design preferences and infection control protocols.

WITHOUT MESH

Blindtex introduces six subtle shower curtain colors, harmonising with various design schemes. The fabric is thoughtfully crafted to be lightweight, striking a balance between practicality and privacy.

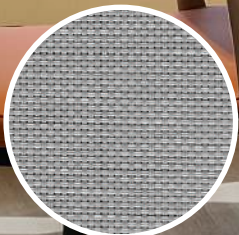

The fabric effectively repels water, and is specially formulated to resist mildew growth on the surface.

The Showertex range completes our commitment to excellence in manufacturing and supplying cubicle curtains, window curtains, and blinds. Encompassing a full 360-degree approach, our shower curtain offering brings together seamless functionality and aesthetic appeal.

Crucially, our shower curtains boast the essential attributes of fire retardant and antibacterial properties, ensuring safety and hygiene in line with industry standards. Blindtex’s dedication to quality and innovation extends to this collection, providing a cohesive solution that caters to the multifaceted needs of modern healthcare and commercial spaces.

ROLLER & VERTICAL BLINDS

OUR COLLECTION

CLASSIC & CONTEMPORARY

Discover Blindtex's exceptional range of commercial roller and vertical blind fabrics, meticulously designed to elevate your workspace aesthetics and functionality.

This collection comprises of three distinct fabric types, each catering to specific needs.

Translucent white and cream (which are the most popular colours) offer a delicate balance between light filtration and privacy. With fire retardant and antibacterial properties, these fabrics ensure safety and hygiene while maintaining an airy ambience.

Blockout fabric, also fire retardant and antibacterial, guarantees that no light will penetrate the fabric, perfect for creating darkness in conference rooms or presentation spaces.

Screen fabrics, boasting openness factors of 3% and 5%, effectively combat glare from screens, making them an office favorite.

The whole range is customisable for printing logos and our unique Anycolour program, enabling limitless options for unique blinds. Blindtex empowers all commercial environments with tailor-made solutions that blend aesthetics and functionality seamlessly.

OUR COLLECTION

— CLASSIC & CONTEMPORARY —

Sheer curtain fabrics epitomise versatility, offering a dynamic range of possibilities to elevate your interiors. With an impressive selection of 20 designs, these curtains can stand alone or harmonise elegantly when paired with heavier fabric curtains. Choose from six header options including the simple pencil pleat or the dreamy wave system to match your preferred aesthetic.

Whether suspended on sleek tracks or adorned with refined poles, sheer curtains seamlessly complement any decor, adapting effortlessly to your style. Their cost-effectiveness lies in their ability to provide privacy while welcoming in gentle natural light—a blend of functionality and ambience that suits a multitude of settings.

A timeless choice found in hotels worldwide, sheer curtains are equally at home in commercial spaces and personal residences. Their universal appeal lies in their ability to bridge privacy and luminance, culminating in a window treatment that effortlessly combines sophistication and practicality.
